

**AVIAN CONSERVATION  
UGANDA SOCIETY**  
*"avian life 4generations"*

**OUR 2022  
JOURNEY!**

The idea of giving back to the environment that gives so much to us finally hatched. Bird lovers came together to form Avian Conservation Uganda Society

"We came together in the spirit of conservation!"  
- Godfrey Elasmus

**We started  
our journey to:**

**1. Raise awareness  
about the  
importance of avian  
life to human life  
and natural  
ecosystems**

**2. Monitor bird  
species & habitats  
through field  
excursions guided  
by professional bird  
guides**

**3. Promote the  
understanding,  
appreciation and  
conservation of  
birds of Uganda**

**4. Build a  
bird-friendly  
community**

**Our  
2022 in  
brief:**

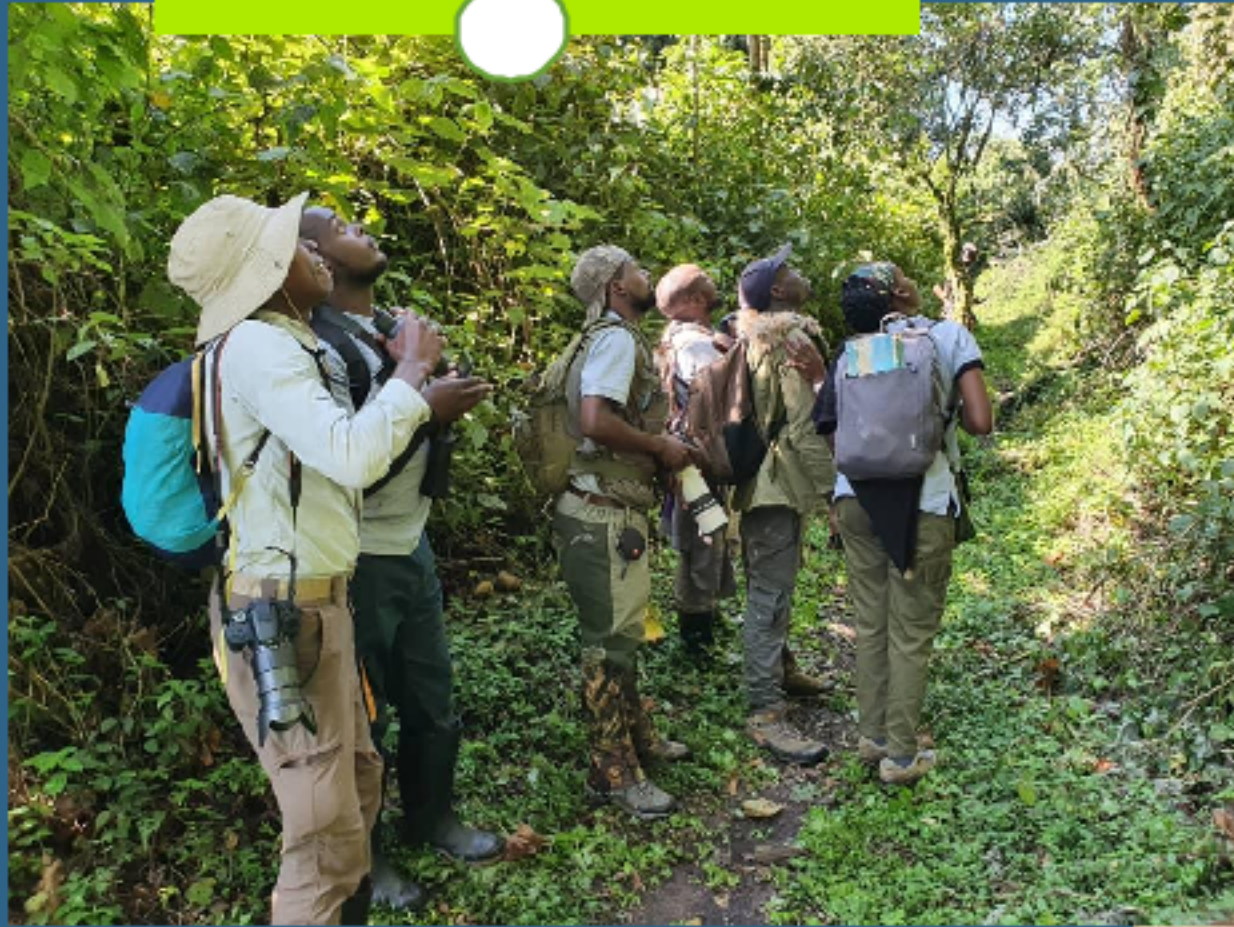

**We work to enhance  
knowledge of the  
birds in Uganda and  
the threats to their  
fragile life**

**We seek to change the "Data deficient" label on the birds of Uganda.**

**We are intentional in increasing access to information about birds of Uganda!**

**We pursue a collaborative approach with partners of mutual interests**

**We received support to enhance our birdwatching experience**

**Our community proudly made the first footprint! Opening a field office**

[www.avianconservationugsociety.org](http://www.avianconservationugsociety.org)

**We reach out  
to our  
members  
physically and  
online**

**@avianlifeuganda**

**Avian  
Conservation  
Uganda  
Society**

**Our membership continues to grow**

**We build strong teams to pursue our ideology**

**Birds are very important because:**

**Birds add incredible beauty to the environment**

**Birds also play a crucial role in the sustenance of natural ecosystems**

@Godfreyt

**But bird habitat continues to be degraded, fragmented or polluted by mans expansive activities such as agriculture, settlement and mining**

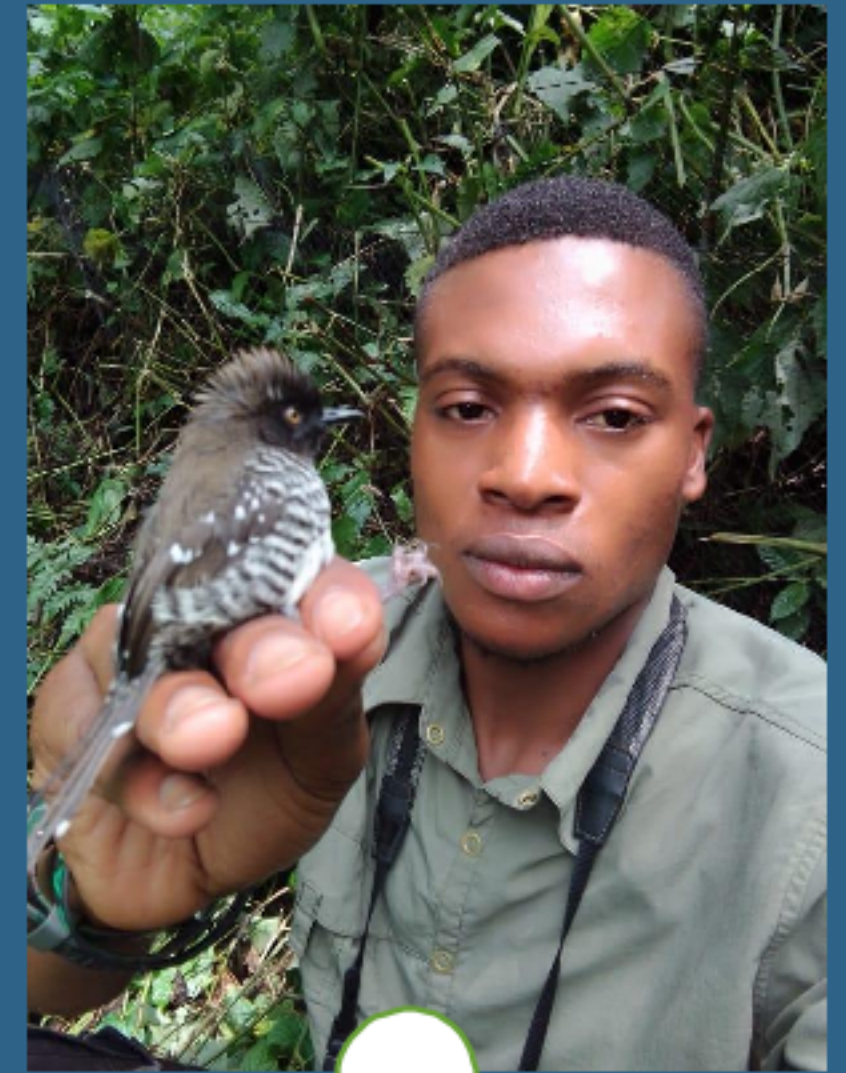

**At Avian Conservation Uganda Society, we strongly believe in;**

**1. finding the right balance to co-exist with birds & nature in general**

**2. Preseving natural landscapes for the benefit of birds & future generations**

**3. Restoring degraded & vulnerable habitat**

**In 2023,  
we shall  
focus on;**

**1. Building the  
knowledge base on  
birds of Uganda  
among young  
people, bird guides  
& general public**

**2. Expanding  
our  
community**

**3. Building our  
capacity to do  
our work and  
achieve our  
goals**
